

MediSync Diagnostic Center

Sample Laboratory Test Report

Patient Name	Nafisa Amin	Patient ID	#P0010
Age / Sex	22 / Female	Report Date	29 Aug 2026
Referred By	Dr. Selina Pervin	Department	Endocrinology

Laboratory Results

Test	Result	Reference Range	Unit	Flag
Fasting Blood Glucose	168	70 – 99	mg/dL	HIGH
HbA1c	7.8	< 5.7	%	HIGH

Interpretation

The sample results show elevated fasting blood glucose and HbA1c values. These results may be consistent with diabetes when interpreted together with the patient's clinical history and other diagnostic criteria. Final diagnosis should be made by a qualified healthcare professional.

Clinical Notes

This document is fictional sample data created for demonstration and testing of the MediSync diagnostic-report workflow. It is not a real medical report and should not be used for clinical decision-making.
